

Richmond Regional Heirs' Property Study

Locality Fact Sheet: Petersburg

Study area: Richmond, Petersburg, Colonial Heights, Hopewell, Henrico County, and Chesterfield County.

This sheet summarizes the heirs' property indicators found across Petersburg's parcels, read from public records. The result is a regional screen identifying parcels with an elevated risk of being an heirs' property, not a legal determination of title. The numbers below show how many parcels were flagged, how they compare to the rest of the local parcel stock, and where in Petersburg they cluster.

Vacancy is the share of parcels with a known USPS vacancy status. Parcels with no status on record are excluded from the denominator.

Property types are groupings of statistically similar parcels. No single trait defines membership.

Hot- and cold-cluster tracts have flagged-parcel rates statistically above or below the regional pattern. Tracts with fewer than 5 heirs-flagged parcels or fewer than 100 total parcels are not assigned a rate class. 0 of 11 tracts here are below that threshold.

High confidence indicates stronger, converging heirs' property evidence. Likely indicates meaningful but less conclusive evidence. Both are classifications, not legal determinations of heirs' property status.
